ចក្ខុវិស័យ | VISION

HTS is committed to being a great business partner by providing high quality high performance products at cost effective prices. HTS HDPE pipes plays an important role in the water supply system in Cambodia by bringing water from source to water supply treatment stations and eventually fresh consumable water to individual households. HTS HDPE Pipeline is a sustainable infrastructure which exceeds industry standards ensuring one of life's basic needs is made available to all communities in Cambodia for generations to come.

ແຜນທິກິດ | MISSION

ជាមួយនានមុខគេក្នុងការធ្វើការផ្តល់ប្រកាសទូទៅពេលមានគុណភាពខ្ពស់ ដើម្បីបំពេញ ក្រុមការអំពីការរៀបចំប្រកាសទីក្រុង សូម ខ្លួន ទុកចមនាគាមនៃ និងបំពេលអគ្គិសនីនៅក្នុងកំបន់ភាសាអាគ្រឹយ ជាកំសេសសមាប័បទិន្នន័យ។

To be one of the leading solution provider for piping systems with a higher quality products to cater to the needs of water mains reticulation, sewerage, gas transportation, telecommunications and electrical conduits in South East Asia especially for any developing countries.

The quality policy of HTS Pipe Industries Ltd is to provide quality plastic and services that consistently meet and exceed expectations of its customers and applicable statutory and regulatory requirements . These aims will be achieved through effective implementation of a management system compliant with ISO 9001:2015. The management systems and its risk based approach will be applied to every subsystem of the organization & will be systematically reviewed through internal audits and management review meetings to identify opportunities to improve effectiveness and enhancing customer as well as organizational satisfaction. This policy is promoted and implemented within HTS Pipe Industries Ltd through its documented quality management system and training of its staff in the implementation process.

HTS HDPE PE112 Pipe provide an effective and economic alternative to cast iron & other traditional systems. It is a total solution for all types of applications for water, gas system include above and below ground.

We are justifiably proud of our global client based. With innovative facilities, standard formulation from Singapore and 100% hdpe virgin grade raw material from arabic, We are able to comprehend th specific needs of our client's particular project. Through a comprehensive & quality focused program, HTS commit to be the top lead for manufacturing to supply of HDPE piping system.

HTS HDPE pipes and fittings are manufactured as per ISO 9001 & ISO 527-2. Products are required to pass strict quality control procedures and are rigorously monitored throughout the production process, from the inspection of raw materials to the storage of the finished products, to ensure their compliance with relevant quality standards.

Review of existing facilities & continual improvements is always a priority, parallel to the consistent production process. Apart from the manufacturing process, HTS also provides on-site engineering, technical and installation consultancy.

HTS High Density Polyethylene Pipes and fittings are durable and strong for long life installation. This piping system is an effective solution for Municipal, Industrial, Marine, Agricultural and Firefighting applications. Its efficiency has been tested and proven for above ground, surface, buried, slip lined, floating and sub-surface applications.

Today HTS proudly serves clients across the sectors in Water Supply, Agriculture Irrigation, Drainage, Building Project, Marine and Gas Supply with the highest quality standards.

HTS HDPE is capable of meeting all your piping requirements.

HDPE PE100

With HTS's advanced technology, HTS HDPE PE112 is an innovation with notable higher pressure and abrasion resistance leading to maximum pipe performance beyond PE100 for sustainable future.

Customer Values

HTS HDPE PE 112 is not only material innovation beyond PE 100, it also creates a number of benefits to customers including, installation process, and cost efficiency.

Sustainable Development

HTS HDPE PE 112 is created through the research and development superior strength performance, providing longer life time service than traditional PE 100, resulting in less material consumption for sustainable future.

10% Higher Pressure Withstanding

Basically, the operating pressure is aligned with thickness & strength of materials as shown in this equation. With MRS 11.2 MPa of HTS HDPE 112, the operating pressure is 10% higher than conventional PE 100.

Up to 10% Higher Output

Higher output from HTS HDPE 112 can increase production efficiency that led to shorten project time and resource saving.
